Strengthen existing and create new connections

Controversies in Rheumatology and Autoimmunity

New autoimmune syndromes are being discovered and described rapidly by leading scientists and these findings raise further questions related to the clinical diagnosis, management, as well as the pathogenesis of rheumatic and autoimmune disorders. CORA 2023 will feature major and short debate sessions, scientific lectures, abstract presentations,

sponsored blocks, as well as many other exciting new session types! CORA 2023 is where difficult clinical cases will be discussed by top experts.

Top Reasons to Attend CORA 2023

CORA 2023 will feature fresh and intuitive program with many debate sessions covering some of the most burning and controversial issues.

- Abstract presentations on a wide range of topics
- Scientific sessions to refresh your knowledge
- Debates and discussions to voice your experience
- Social programs and session breaks to meet your colleagues
- Sponsored blocks on the current trends in the field
